

Aquamix 1.25 v

Fertilise and water at the same time – Mixing ratio from 0.2 % to 2.0 %

The integrated dosage system automatically adds fertiliser to the water in the chosen dosage. To fertilise and to water can be so easy! Fill with liquid fertiliser, select the concentration, connect the water hose, open the water tap completely and start – carrying watering cans becomes obsolete!

**2**

- 4 mixing ratios
- Neutral position for watering
- Precise dosing
- High water flow rate (4 l/min at 4 bar)
- Swivelling handle

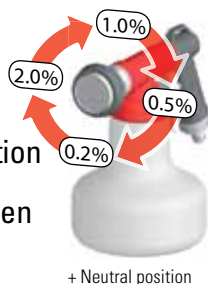

Special version for nematodes application available

Made in Switzerland

There is no easier way to do it:

- 1** Fill in liquid fertiliser
- 2** Screw the mixing device onto the container
- 3** Select the preferred concentration
- 4** Connect the water hose and open the water tap completely
- 5** Start going: Fertilise and water at the same time

Aquamix 1.25 V
Art.No. 11953401

Special version for
Nematodes

AquaNemix 1.25 V
Art.No. 11953501

Precise mixing ratio selectable:

0.2 %, 0.5 %, 1.0 % and 2.0 %

The integrated dosage system automatically adds fertiliser to the water in the chosen dosage. The Aquamix filled with 1 l concentrate last for:

Selected Concentration	Mixture of water/concentrate
0.2 %	500 litre
0.5 %	200 litre
1.0 %	100 litre
2.0 %	50 litre
—	Neutral position for watering without concentrate
