The new battery-operated backpack sprayer: high-performance, versatile, ergonomic...

The completely new concept of controlling the pressure by electronics enables new options for the user. The operating pressure at the nozzle is adjusted with an application controller. Everything is monitored and controlled by the electronics: constant pressure, on, off, pump protection functions and battery charge state. The removable battery enables uninterrupted working. No control wires in the hand valve. Therefore less prone to faults and the accessories can be used to their full extent.

Real work comfort!

- Consistent spray pattern
- Drop size adjustable
