Protect-us™ RAT & MOUSE MONITOR BLOCKS

DIRECTIONS FOR USE

Protect-us Rat & Mouse Monitor Blocks are a 25 g non-toxic extruded wax block bait for monitoring rodent activity in sensitive areas or use it as part of a maintenance program. The product retains its attractiveness to rats and mice in damp locations and is enriched with highly palatable food ingredients for rodents. Thanks to its hole in the middle, it can be fixed in manholes above the water level, while its irregular and sharp-cornered form increases its attractiveness to rodents. It can be easily secured on the rods of bait stations. Once rodent activity is detected, use Protect-us Stealth Block Rat & Mouse Bait or Verminate Soft Bait Rodenticide containing broadifacoum or; MUSKIL Dual Active Rodenticide Blocks or MUSKIL Dual Active Soft Bait containing difenacoum and bromadiolone to eliminate the infestation.

AREAS OF USE

Protect-us Rat & Mouse Monitor Blocks can be used in food industries, in the storage and conservation of foodstuffs, schools, hospitals or any place where, according to HACCP and IPM (Integrated Pest Management) the use of poisonous baits must be reduced or avoided. It is always advisable to protect bait points from non-target animals and from water, preferably using commercially available bait stations.

APPLICATION RATE

Baits should be placed in bait stations or otherwise secured out of reach of non-target animals. Place baits around the periphery of buildings, especially near locations of rodent entry and in areas that provide rodent harbourage.

- **Rats: place 1 MONITOR BLOCK every 5 - 9 metres**
- **Mice: place 1 MONITOR BLOCK every 2 - 3 metres**

Inspect routinely for rodent activity and replace spoiled baits. If the bait has been gnawed or eaten replace these placebo baits with toxic baits or traps until the infestation has been controlled.

STORAGE AND DISPOSAL

Store in the closed original container in a cool, well ventilated area. DO NOT store for prolonged periods in direct sunlight. Dispose of unused bait or empty containers with normal household or industrial waste.

NOTICE

Protect-us Australia warrants that this product conforms to its description and is reasonably fit for the purposes stated on the label when used in accordance with directions for use under normal conditions of use. No warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of the product contrary to label instructions, or under abnormal conditions.
