STERiSCREEN™

DISINFECTANT SMOKE GENERATOR

A HIGHLY EFFECTIVE AND UNIQUE METHOD FOR
IMPROVED STERILISATION.

LOW TOXIC, DRY SMOKE DISINFECTANT WITH
POTENT BACTERICIDAL, VIRUCIDAL AND
FUNGICIDAL PROPERTIES.

PERFECT HYGIENE SOLUTION FOR
MODERN INDUSTRY AND SOCIETY.

IDEAL FOR:

**Crop
Protection**

**Public
Health**

**The Food
Industry**

**Animal
Health**

**A NEW GENERATION IN
STERILISATION TECHNOLOGY
IS HERE!**

Protect-us STERiSCREEN™

DISINFECTANT SMOKE GENERATOR

The use of traditional disinfection products often involves problematic handling of hazardous substances and their negative effect on equipment and premises.

By using a dry disinfectant smoke, it is possible to reduce disinfection treatment costs and, at the same time improve the production environment ensuring better working conditions and enhanced product quality.

STERiSCREEN has been developed to offer an easy to use and safe high performance disinfecting solution, that provides outstanding control of direct and indirect contamination sources.

FEATURES

- A broad-spectrum microbicide, effective against all vegetative bacteria, fungi, and viruses, it is also sporicidal.
- Optimal effective use of small quantities of disinfectant which minimises any impact on the environment while maximising results.
- Disinfectant is deposited everywhere (vertical, horizontal and underside of horizontal surfaces) which ensures a more thorough treatment.
- Easy to treat inaccessible areas - roofs, false roofs, nooks and crannies, etc.
- Lower operator and worker exposure to disinfectants makes it safer.
- STERiSCREEN does not increase the humidity of the treated rooms meaning fungal growth is not encouraged.
- Effective treatment of any enclosed area.
